## —Release Notes—

Another bucko-out, and only one more to go!

More content in this bucko. Check the dls, find all the #grandline regulars in this release, and even Doku, our very own breathing comic relief!

If you wonder about the number of "ugh's" in this bucko, that's supposed to be the sound effect for a type of horn that appears to be very popular in Japan. Considering the release was delayed for dops because of these as they were edited, one by one, we're now trying to eradicate them. Help us help you, destroy them on sight!

Pages 372-377 were skipped—yet another unrelated story

—This is a joint project by Mangan, Densetsu, and Hinkle—
